recommendations for the DVST Department include: **1. Select the best use of the 1.5 hrs of flow to maximize student access and success in academic programs.** The DVST Department is presently extremely engaged in its current efforts to improve the student experience and ensure that all students have the opportunity to earn their

degree.

Recommendation #1

Narrow the departmental mandate to focus resources

in collaboration with the

Department of Health Services

and focus on the development of

the Department of Health Services

the Department of Health Services is currently engaged in a process of reviewing its mandate and resources to ensure that it is focused on its core mission of providing high-quality health care services to the community. This process involves a thorough analysis of the department's current activities, including its academic programs, clinical services, and administrative functions. The goal is to identify areas where resources can be better utilized to improve patient care and advance the department's strategic goals.

The Department of Health Services is committed to providing the highest quality of care to our patients and to our community. We are currently engaged in a process of reviewing our mandate and resources to ensure that we are focused on our core mission of providing high-quality health care services to the community. This process involves a thorough analysis of our current activities, including our academic programs, clinical services, and administrative functions. The goal is to identify areas where resources can be better utilized to improve patient care and advance our strategic goals.

DVST Program Review Follow up Plan

Kathy Denton, VP Academic
November 3, 2011

Administrative policy A18.01.01, Program and Snd SndeisD,1(nd)73(-2(ne(inis)2(nd)73(-0wv1n)73

require additional preparation before entering college-level courses. The renaming should be done separately for DVST English and DVST Math in consultation with other departments in their new Faculties.

Recommendations associated with course delivery

DVST English and DVST Math should work with colleagues who teach in programs with high attrition rates to develop courses that provide language or math skangangeeqw J0004 Tc 4.

DVST English should develop 3-credit preparatory English courses to meet the needs of students who have specific areas of weakness.

DVST English should collaborate with EASL regarding how to meet the needs of students characterized as Generation 1.5.

DVST English and DVST Math should increase hybrid delivery options for students. At least one 300-level and one 400-level hybrid DVST course in Math and English should be offered each semester.

Recommendations associated with assessment and admission

Students should not be assessed multiple times to be placed in a Math or English course; a single standardized test in Math or English should be used. The College has adopted placement tests to identify whether students demonstrate college-level skills in Math and English. Some of these tests, including test the College uses to assess English proficiency (i.e., Accuplacer) do not identify where to place students whose skills fall below college-level. Understandably, DVST has been re-assessing students with their own tests. Multiple testing is inefficient, increases program
