

EFFECTIVE: SEPTEMBER 2004 CURRICULUM GUIDELINES

A. Division: Science and Technology

M: Course Objectives / Learning Outcomes

BODY STRUCTURE AND ORGANIZATION - levels of structural organization 5. - directional terms - body planes - body cavities - body systems INTEGUMENTARY SYSTEM - epidermis-structure and function 6. - dermis-structure and function - skin derivatives - disorders **SKELETAL SYSTEM - functions** 7. - classification - bone structure - bone formation - bone growth - homeostasis - bone disorders - axial skeleton - appendicular skeleton 8. **ARTICULATIONS** - classification - characteristics - structure and function of major joints - joint disorders - lever systems - biomechanical principles 9. MUSCULAR SYSTEM - muscle types - characteristics - muscle growth and development - skeletal muscle - types of fibers - gross anatomy - microscopic anatomy -mechanism of contraction -kinds of contractions - smooth muscle -structure and function - cardiac muscle -structure and function - muscle homeostasis - muscle disorders - principle skeletal muscles 10. NERVOUS SYSTEM - organization - CNS, PNS, ANS - growth and development - brain - structure and function - spinal cord-structure and function - physiology of impulse transmission - spinal and cranial nerves - neurotransmitters - reflex arc - sensory receptors - proprioception - sensory and motor pathways - motor unit - special senses- vision, hearing, smell, taste - nervous system disorders
