## M: Course Objectives/Learning Outcomes:

At the end of the course, the student will be able to:

- 1. apply the economic concepts of supply and demand to the process of price determination in both perfect and imperfect markets;
- 2. explain household market behaviour and the derivation of an industry demand curve;
- 3. evaluate the price and output implications of profit maximizing (loss minimizing) behaviour of firms under different demand, cost and market structure conditions, including the derivation of an industry supply curve;
- 4. demonstrate the reasons for, and economic consequences of, various forms of government intervention in different markets.

## N: Course Content

The first 15 chapters of Lipsey (8th Edition), or equivalent, will be assigned as the "core" reading unit for this course. In addition, general concepts regarding environmental externalities will be covered as part of "core". "Core" content includes:

- 1. The nature of economics
- 2. An overview of the economy
- 3. The price system: demand, supply and price
- 4. Barriers to trade
- 5. Elasticity of demand and supply
- 6. Price controls
- 7. Household consumption behaviour: marginal utility and/or indifference curve approaches
- 8. Production and cost: short-run and long-run
- 9. Comparison of firms operating in different market structures
- 10. Factor pricing and the distribution of national income
- 11. Market failure and government intervention

Other topics may be discussed as time permits and at the discretion of the instructor.
