Course evaluation consistent with U.C. D. 49 as to course evaluation policy. An evaluation survey is administered at the beginning of the course. Respect for individual choice and an openness to negotiation are components of the methods of evaluation.

encompasses the five domains of nursing practice: health and health care, professional responsibility, collaborative leadership, competencies, and quality. Clinical appraisal forms are used to encourage teaching/learning, clinical judgment, and quality indicators. Quality indicators in the course are a component of successful completion of this course.

This is a mastery course.
